

IINVSYS
SALES OS · v1.0

// REFERRER MANUAL

Adding Leads

Step by Step

What to do at the expo, what each field means,
and what to do when something goes wrong.

WELCOME

What this guide is for

You have been set up as a **Referrer** on the IINVSYS Sales OS. Your job at the expo is simple: when a visitor stops by your booth, capture their details in the portal so the sales team can follow up. This short manual walks you through exactly how to do that, and what to do if you see an error along the way.

In five minutes you will know how to:

- Sign in to the portal at **sales.iinvsys.com:8413**.
- Open your assigned expo and add a new lead.
- Edit a lead you have already added.
- Recognise the most common errors and fix them.

What you can and can't do as a Referrer

Referrers can ADD leads at the expo they are assigned to and EDIT the leads they themselves added. You will not see other agents' leads, the pipeline view, or the analytics — that is by design. If you cannot see something this manual mentions, it usually means an admin has not yet enabled it for your account.

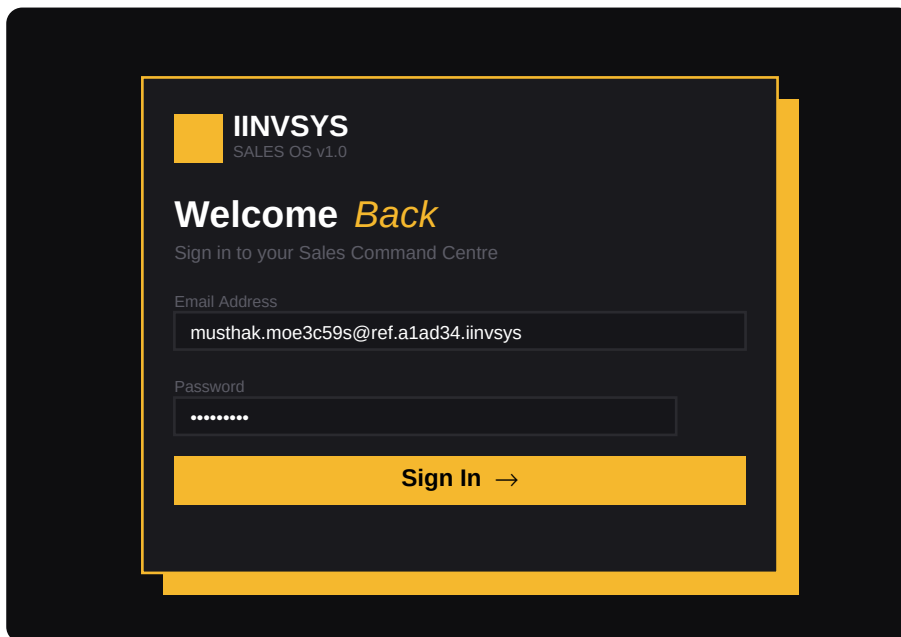

Open this URL in any modern browser (Chrome, Edge, Safari, Firefox):

<https://sales.iinvsys.com:8413/>

STEP 1

Sign in to the portal

Open the URL above. You will land on the IINVSYS welcome screen.

Do this

1. Type your **Referrer email address** in the Email Address box. It looks like `name.code@ref.xxxxxx.iinvsys`.
2. Type your **password** in the Password box. The password is case-sensitive, so check the Caps Lock key.
3. Click the gold **Sign In →** button.

Tip · Save the page

Bookmark the page (Ctrl+D / Cmd+D) so you can open it in one click on the day of the expo. Your password is never auto-filled by the system; your browser may offer to remember it for you.

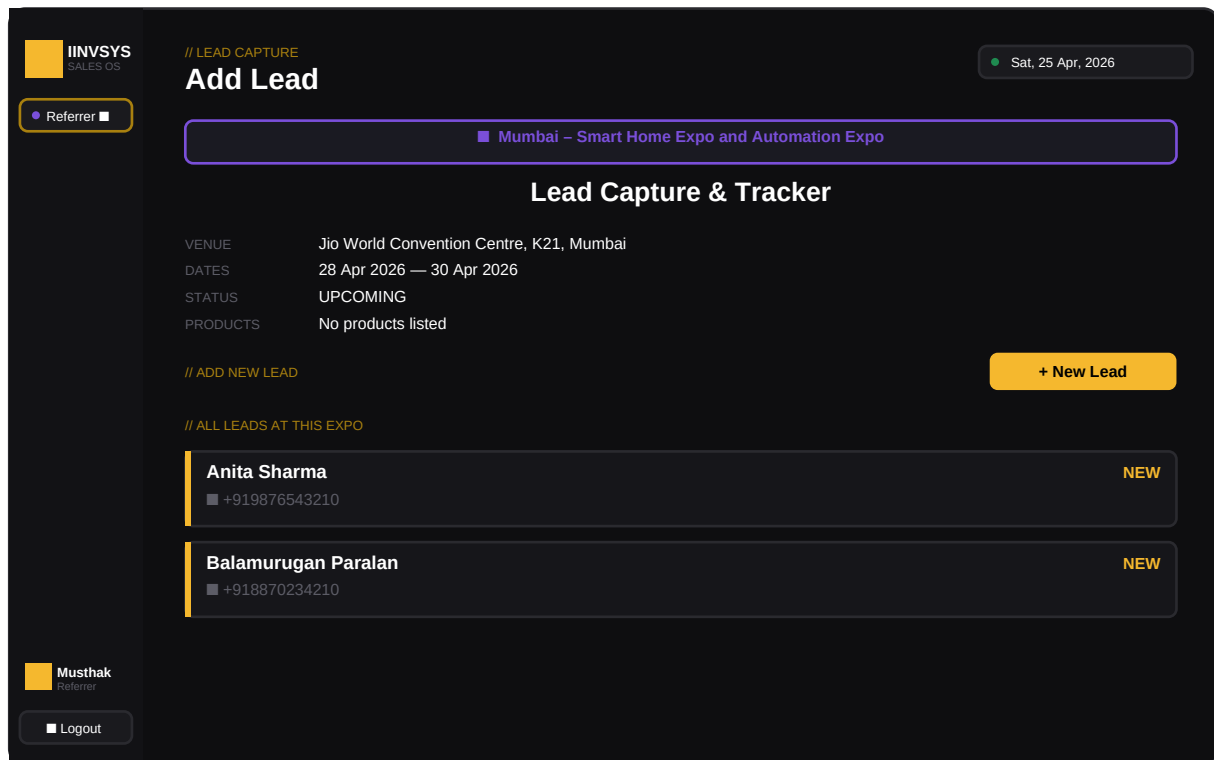

If sign-in fails

If you see "Invalid credentials" after pressing Sign In, double-check the email for typos (the part after @ matters), retype the password, and try again. After three failed attempts, ask the admin to reset it rather than guessing — too many failures can lock the account.

STEP 2

Find your expo

After signing in, you go straight to your assigned expo. There is no menu to navigate — the screen below is your home page.

What you see on this page

Sidebar (left) — Shows your role badge (“Referrer”), your name, and a Logout button. There is no other navigation — this is intentional.

Expo banner (purple) — The name of the expo you are assigned to. If you are at a different event, contact your admin — you can only add leads to the expo shown.

Expo info block — Venue, dates, status (UPCOMING / LIVE / ENDED), and any products listed for the expo. Status “UPCOMING” is fine — you can capture leads before doors open.

+ New Lead button — The gold button on the right. This opens the lead-capture form.

All leads at this expo — A scrollable list of leads. Cards marked “My Lead” are ones you added — only those have an Edit button visible to you.

STEP 3

Add a new lead

Click **+ New Lead**. The form expands directly on the page (no popup window). It has two sides: a quick scan option at the top, and manual entry below.

// LEAD CAPTURE

Add New Lead

[Scan Business Card]

— or enter manually —

Full Name *

e.g. Rajesh Sharma

Phone *

+91 98200 00000

Email (optional)

email@example.com

Company (optional)

Company name

Notes (optional)

Product interest, booth interaction...

Capture Lead →

Field by field

Field	Required?	What to put
Full Name	Yes	First and last name. Spell it the way the visitor said it.
Phone	Yes	Mobile preferred. Include country code if you know it (e.g. +91...).
Email	No	Useful for follow-up. Skip if the visitor doesn't want to share.
Company	No	Their organisation. Helpful when one company sends several visitors.
Notes	No	Free text — what they were interested in, what was promised, etc.

Tip · Use Scan Business Card when you can

If the visitor hands you a business card, tap “Scan Business Card” before typing. The scanner reads the card and pre-fills the fields — you only have to correct what it got wrong, then press Capture Lead.

STEP 4

Save the lead

When the form is filled in, press the gold **Capture Lead** → button. The form closes, the new lead jumps to the top of the “All Leads at this Expo” list, and you see a small confirmation that says “**1 lead captured today ✓**” just below the form.

// LEAD CAPTURE
Add New Lead

[Scan Business Card]

— or enter manually —

Full Name *

Anita Sharma

Phone *

+91 98765 43210

Email (optional)

anita.sharma@example.com

Company (optional)

Sharma Interiors Pvt Ltd

Notes (optional)

Interested in smart lighting; follow up after expo

Capture Lead →

What “success” looks like

- The form collapses back to a single + New Lead button.
- Your new lead appears at the top of the list with a NEW pill and the “My Lead” label.
- The lead has an Edit button — only your own leads do.

Edit a lead you added

Find your lead in the list and press its **Edit** button. A small window opens with extra fields: Stage (where the lead is in the pipeline) and a read-only Product Interest box. You can change name, phone, email, stage and notes. Press **Save Changes** to keep, or **Cancel** to discard.

// LEAD CAPTURE

Edit My Lead

Full Name *

Anita Sharma

Phone *

+91 98765 43210

Email *(optional)*

anita.sharma@example.com

Stage *

New ▼

Notes *(optional)*

Interested in smart lighting; follow up after expo

Save Changes →

About the Stage dropdown

Stage tells the sales team where the lead is in the pipeline. As a referrer you will normally leave it on **New** — that is the default for any lead you just captured. Move it forward only if you are sure: for example, choose **Contacted** if you have already called or written to the visitor since the expo, or **Interested** if they have asked for a quote. If you are not sure, leave it as New and let the assigned agent take it from there.

Product Interest is read-only for referrers

The Product Interest box says “Product selection managed by admin”. That is by design — referrers capture the lead, and admin (or the assigned agent) tags products against it later. If a visitor names a specific product, just write it in the Notes field instead — the admin will see it and tag it on the back end.

STEP 5

If something goes wrong

These are the messages you are most likely to see, and what to do about each one. Errors appear as a red toast in the bottom-right corner of the screen — they fade away after a few seconds.

Error · “Name and phone are required”

(toast appears at bottom-right of screen)

Name and phone are required

What it means: You pressed Capture Lead without filling in the Full Name field, the Phone field, or both.

What to do: Type a name and a phone number, then press Capture Lead again. Email, Company and Notes are optional and will not trigger this message.

Symptom · Capture Lead button does nothing

Likely cause · Wi-Fi has dropped

If pressing Capture Lead doesn't add a card to the list and no message appears, your device has probably lost its connection.

1. Check the Wi-Fi icon at the top of your screen.
2. Reconnect to the venue Wi-Fi (or switch to mobile data).
3. Press Capture Lead once more — do NOT refresh the page first; your typed details would be lost.

Symptom · You are bumped back to the login screen

Cause · Your session expired

For security, the portal logs you out after a long period of inactivity. Sign in again with the same email and password — your earlier leads are saved and waiting in the list. If you keep getting logged out within minutes, ask the admin to check the session length.

Symptom · No expo on the page, or the wrong one

Cause · Your account isn't assigned to this expo

Referrer accounts can only see the expo their admin has linked them to. If you are at the wrong event, or the page is empty, do not create leads under a different expo — they will be filed against the wrong campaign. Message the admin to update your assignment first.

Symptom · Same person walks up twice

What to do

The portal does NOT block duplicate phone numbers — if you press Capture Lead a second time, a new card will be created. Before adding, scroll the list once and search for the visitor's name. If you find an earlier card with the “My Lead” tag, press Edit on that one and add to the Notes instead of creating a second card.

REFERENCE

Troubleshooting at a glance

Use this table when you don't have time to read. Find the symptom in the left column and follow the action on the right.

Symptom	Most likely cause	What to do
"Invalid credentials" at sign-in	Wrong email or password	Re-type carefully. Check Caps Lock. After 3 fails, contact admin to reset.
"Name and phone are required" toast	Empty mandatory field	Fill Full Name AND Phone, then press Capture Lead again.
Capture Lead does nothing, no message	Wi-Fi dropped	Reconnect to the venue Wi-Fi; press Capture Lead again. Do NOT refresh.
Page suddenly looks empty / blank	Browser tab fell asleep	Pull down / refresh once. If the form was open, you'll need to retype.
You see a different expo, or no expo at all	Account not assigned	Stop. Message the admin and ask to be linked to the correct expo first.
Bumped to the login screen mid-session	Session expired	Sign in again with the same credentials; your existing leads are safe.
List shows duplicates of the same visitor	Multiple Capture Lead presses	Edit one of the duplicates with full details. Ask admin to merge / delete.
Can't see Edit button on a lead	Not your lead	Only the person who created a lead (or an admin) can edit it.
Scan Business Card returns nothing	Bad lighting / angle	Move to better light, hold the card flat, retake. Or just type manually.
Phone keyboard won't show + symbol	Mobile keyboard layout	Long-press the 0 key, or paste +91 from a notes app. Country code is optional.
Site won't load on the venue Wi-Fi	Captive portal blocking	Open any other site first to trigger the venue login, then return.

Who to contact

First, try this	Then, if it doesn't help
Re-read the message in this manual's troubleshooting table. Most issues are simple typos, dropped Wi-Fi, or an expired session.	Message your IINVSYS admin via WhatsApp or email. Tell them: (1) what you were trying to do, (2) what message you saw, (3) the visitor's name (so the lead isn't lost). Take a quick screenshot if you can — it speeds up the fix.

CHEAT SHEET

Tear-out: lead capture in 30 seconds

1	Open https://sales.iinvsys.com:8413
2	Sign in with your Referrer email and password
3	On the Lead Capture page, press + New Lead
4	Type Full Name and Phone (Email/Company/Notes are optional)
5	Press Capture Lead → — the new card appears at the top of the list
6	Need to fix something? Find your card → press Edit → Save Changes

Three things to remember

1. Only Full Name and Phone are required — everything else is optional.
2. Errors appear as a red toast at the bottom-right of the screen.
3. If something feels wrong (no expo, can't see your leads, duplicate cards), **stop and ask the admin** before adding more — fixing one wrong lead is easier than fixing twenty.

You're set

Sign in. Press + New Lead. Type Name and Phone. Press Capture Lead. That's the whole job. Everything else in this manual is just there for the rare moment something doesn't go as planned.
