CRM Data Dictionary & Field Definitions

Every field in the iinvsys CRM — what it means, what to enter, what the valid values are.

PURPOSE

The CRM is only as useful as the data in it. Clean data = accurate forecasting. Garbage data = wrong decisions. This dictionary defines every mandatory CRM field. If a field is marked MANDATORY, it must be filled at the relevant stage. Leaving mandatory fields blank will flag your record for manager review.

GOLDEN RULE: Enter data the way you would want to read it in a report 6 months from now. Full names. Full product names. Complete next actions. Not 'followed up' — 'Called on 14 July, sent revised proposal to Rajesh Kumar. Waiting for his MD's approval. Next call: 21 July.'

CRM HYGIENE RULES

- ▶ **Close Date** Update immediately when the expected date changes. An expired close date = inaccurate forecast.
- ▶ **Probability** Do not override the stage default up by more than 15% without a note explaining why.
- ▶ **Next Follow-up Date** Every open deal must have a future follow-up date. No exceptions.
- ▶ **Notes** Minimum one note per week for every deal in Stage 3 and above.
- ▶ **Duplicate Prevention** Before creating a new contact, search by phone number first. Duplicates corrupt reporting.
